Tacoma Smelter Plume Site														
Pierce County Footprint Study														
Summary of Sample Collection														
	Zone	Location	Number of	Number of Locations with: (counts for borings and depths sampled)						Boring Counts:		Sample Counts:		
		Type	Locations	Borings:	1	2	3	3	4	4	residential	forest	residential	forest
			Sampled	Depths: (a)	2	2	2	3	2	3				
	D1	residential	65						39	26	260		624	
		forest	3				2	1				9		21
	D2	residential	27						20	6	107		238	
		forest	7				5	2				21		48
	D3	residential	13							11	2	52		112
		forest	3				2 (b)	1				9		23
	U1	forest	21				14	7				63		147
	U2	forest	43			43						86		172
	U3	forest	12		12							12		24
	Total locations sampled:		194											
	Total boring count:		619								419	200		
	Total sample count:		1,409										974	435
	NOTES:													
	Data format example: In Zone D1, 65 residential locations were sampled.													
	At 39 of those 65 locations, samples were collected from 2 depths in each of 4 borings.													
	At 26 of those 65 locations, samples were collected from 3 depths at each of 4 borings.													
	(a)	depth intervals sampled were 0-2" and 2-6" (all locations) and 6-12" (selected locations).												
	(b)	one boring out of three at each of these two locations was sampled at a third depth interval.
